

Hello All,

The temperature this afternoon was 55 degrees and while we aren't to spring yet and even with the threat of more cold weather coming, there is hope.

This year our show is featuring Belt and Steam Power. It is unclear how at this point how many steamers will be at the show, but the Belt portion of the feature leave equipment open to a wide variety of engines and tractors. Bring your equipment and belt and let's show our visitors how this equipment ran years ago.

I'd like to ask all Club Members, especially those who are not able to attend our monthly meetings, to considering volunteering at our show in September. We need help in all areas of the show. If you can help, please call myself, any board member or officer.

The Club picnic and tractor ride are scheduled for July 8, 2018. This year the ride will leave from Union Grove at about 8:30 am with breakfast at the Kansasville Fire Department just down the road from the Fair Grounds. Dennis Vignieri has graciously offered to host the picnic again this year. More details to follow.

Happy Spring!

Paul Mantey
